

Dear All,

This document contains detailed information about the final. Please read this document carefully. Also follow these rules when you solve the practice final.

Time and location:

May 11, 1:10-2:40pm, 702 Hamilton Hall

The final:

- a) You have 90min to solve the final.
- b) Contrary to the midterm you are allowed to use a **non-graphing calculator** during the final exam. **Failure to comply with this rule (i.e. using a graphing calculator or a laptop) will automatically lead to zero points.** I will not answer to e-mails asking whether a specific calculator model is permitted.
- c) You are allowed to bring **one hand-written "cheat sheet" (8.5x11 inches, two sided)** to the exam (you can write on it whatever you want). **No other aids are allowed. Failure to comply with this rule will lead to zero points.**
- d) If you need to go to the bathroom, raise your hand and let the TA know. Only one student can go to the bathroom at a time.
- e) You can hand in your solutions early up to 15min before the end. No early hand-in in the last 15min.
- f) Write your name and UNI on both the blue book and the exam paper. Hand in BOTH at the end.

What problems to expect and how to prepare for them:

- a) The best way to prepare for the final is to redo the examples I did in class and the HW problems. Consult the lecture notes and the textbook if that helps you solve the problems. You do not have to read the whole textbook. I only assume what we did in class and what you did in the HW assignments.
- b) The final problems are similar to the class examples or the homework problems. Of course, the homework problems are more difficult than the class examples (when you tried to solve them for the FIRST time). What I expect is that when you see a problem (that is similar to a homework problem) for the SECOND time (in the final) that you readily know how to solve it. A good test is this: if I asked you to solve the homework problems AGAIN, would you be able to do it reasonably fast?
- c) I posted a practice final on courseworks. The actual final will be very similar in terms of difficulty and length. The solutions for the practice final also reflect the level of details I expect in the final.

Disability-related accommodations:
